

Self-Test RCCB Campaign in Ipoh

Over the past two years of roadshows, TEEAM received the most overwhelming response for the national campaign on Self-Test Residual Current Circuit Breaker (RCCB) from the Ipoh Station in 2015. TEEAM conducted another roadshow in Ipoh this year to create more awareness and brief the public on the importance of Self-Test RCCB at home. A 2-day roadshow was held on 4th & 5th June 2016 at the AEON Ipoh Station 18 Shopping Centre. This was jointly organised with the local State Associations, namely, the Perak Electrical Chargemen & Wiremen Competence Association (PKPPE) and the Perak Electrical Association (PEA). It was supported and sponsored by Schneider Electric Industries Malaysia Sdn Bhd.

TEEAM has invited official from the Energy Commission (ST) Perak to join the event and to deliver the keynote address during the opening ceremony. The ST Representative, Mr Muhammad

Hasanol Mustafa, together with the Presidents of TEEAM, PKPPE and PEA, were present for the Official Opening of the event. TEEAM appreciates for the media and newspaper coverages from NTV 7, 988 Radio Station, Sin Chew Daily, China Press, Nanyang Siang Pau and others for the Public Service Announcements (PSAs) and timely news publishing about this crucial life-saving safety programme for the masses.

This roadshow provided a good platform to successfully reach out to the set target of one million people in Malaysia, in order for them to understand the importance of the RCCB self-testing electrical safety procedure at home. The TEEAM roadshow was a great success and it received good response from the local communities.

Great support – (from right) Mr Choong Soon Yean (PKPPE President), Mr Muhammad Hasanol Mustafa (ST Executive), Ir Chew Shee Fuee KMN (TEEAM President), Mr Chan Kaim Sam (PEA President) and Ms Maziah Mat (The Mall Manager).

Media publicity – TEEAM in an NTV7 news channel coverage.

Team work – PKPPE, PEA and TEEAM officials.

Demo – Mr Dahari Mat Siran (TEEAM Electrical & Safety Chairman) explained and showed the correct RCCB testing procedure to the general public.

Opening Ceremony – Invited guest, Mr Muhammad Hasanol Mustafa (ST Executive) delivered his keynote speech.

Good response – The officials giving an explanation to the general public on home electrical safety.
